Project

**Statistical Directory
Ministry of Research and Universities
2023-2024**

A Laravel-based system for the Ministry of Research and Universities to manage and analyze student, professor, and institution data from uploaded files. It efficiently handles large datasets (100,000+ records) for statistical reporting and decision-making

**Document Management and Archiving System
Company
2024-2025**

A secure Spring Boot and Angular-based solution for clients to upload documents, enabling role-based access, download, and deletion for authorized company users, ensuring efficient and controlled file handling

**E-Learning Platform with Admin Dashboard
Customer
2023-2022**

A Django backend with REST API for user management, courses, quizzes, and progress tracking, paired with a React frontend for an interactive student and instructor experience. The admin dashboard allows managing users, courses, and analytics.
